EDUCATION

Programador Full Stack Javascript Profissional

OneBitCode, Online

apr 2022 -- aug 2022

EXPERIENCE

Full Stack Developer

Economy Software, Home Office

jan 2023 - today

- During my professional experience, I had the opportunity to work on a project using a variety of technologies and methodologies. I worked with javascript, selenium ide, postgres and vuejs, and used Scrum as a working methodology. I also worked with automated deployments using Jenkins, and translated legacy Java code into javascript. In some cases, I also had direct contact with the client and performed maintenance on both the front end and the backend.

PROJETOS

E-commerce

Full Stack

nov 2022 - today

- A complete e-commerce platform that features a payment system, administration systems, and clean architecture.

[Live Project](#)

Rest Countries

Front End

dec 2022 - dec 2022

- A challenge done through a website, where an API with various information from different countries is provided. You can filter by region, search by country, and of course, learn a little about a country's information in an extremely summarized way.
