Experience

Economy Software

Jan 2023 - Today   Full Stack & Mobile Developer, full-time

- In the first week, I took on the responsibility of translating critical parts of the Java system into JavaScript, contributing to a successful migration.
- I work in the continuous development of new features, ensuring agile responses to customer demands and effective satisfaction of their needs.
- As a direct point of contact, I provide support, clarify doubts, and promote understanding and addressing of each customer's unique needs.
- Recently, I developed an innovative feature that allowed customers to customize their own orders through a text editor, overcoming limitations of fixed layout on thermal printers.

INAED

Jun 2023 - Aug 2023   Full Stack Developer, Freelancer

- I autonomously managed the entire project, from initial planning to final delivery, establishing clear deadlines and milestones to efficiently achieve the project's objectives.
- I led an intern at the company, providing detailed guidance and overseeing their progress in the project. This included training, addressing questions, and fostering a collaborative learning environment.
- I developed the website from scratch, covering all stages, including creating an intuitive administration system, user authentication and authorization, and a multimedia content gallery platform.
- I gained proficiency in essential technologies such as Linux, Let's Encrypt, VPS, and Docker to ensure the continuous and effective operation of the project.

Bravo Metalúrgica

Aug 2023 - Aug 2023   Front End Developer, Freelancer

- I developed and implemented a Landing Page (LP) according to the provided design, ensuring an effective and aesthetically appealing execution.
- I collaborated with the client to ensure satisfaction and compliance with project expectations.
- Used ChakraUI techniques to craft a functional and responsive webpage.
